Re: March Public Works Report

Streets – March was a cold and dreary month. We had the big snow on March 24th. The snow was wet and heavy! In between snow and rain showers we were able to get the streets swept. We also got the offices painted at the shop and organized some of the file cabinets. Vehicles serviced: 590, 550, 910, 850, 840, 830, 820.

Sewer – We are having an issue with a pump in the Edgewood lift station. I'm working with Electric Pump Co to get it resolved. I having been working with Kyla on updating sewer maps in our GIS system. We found a couple manholes that were buried and I had the crew raise them. There is another one buried under the street on Wolf Creek Trail that we will raise this summer.

Storm Water – Nothing to report.
