Re: December Public Works Report

Streets – After the cold start to Fall I was expecting more of the same for December. Didn't happen! A mild December allowed us to get caught up on vehicle servicing and get the snowflakes put up. Last year was similar in that the majority of our snow occurred in January and February. Let's hope it doesn't turn out the same this year.

Other projects we completed/worked on:

- Put up snowflakes.
- Put up snow fence on N. Center Point Rd.
- Sweep streets
- Change bucket cutting edges on 540 and 570.
- Repair damaged signs at various locations
- Check locates

Vehicles serviced: Well #7 generator, 850, 810, 830, 700, 510, 500, 530, 565, 580.

Sewer – Still waiting for Electric Pump to get pump repaired for the Edgewood Rd lift station. They took it in for repairs and will finish the lift station inspections when they get this pump repaired.

Storm Water – We are still investigating the Kainz Dr storm sewer. We were able to get some larger rocks cleaned out of the main line and are now waiting for Schmidt to come back and try to televise it.
