Re: September Public Works Report

Streets – The big project of the month was installing some new playground equipment in Tucker Park, in spite of all the rain! This was installed where some older equipment was that flooded when Dry Creek flooded. So, we hauled in some extra dirt and raised it up about 1 foot. We got it pretty much completed except for final grading and seeding which we'll complete in the spring.

Other projects we completed/worked on:

- Replace concrete on Cree Parkway from water main break.
- Remove rubberized surface at Guthridge Splash Pad.
- Check locates
- Take down flags
- Mow ROW.

Vehicles serviced: 920, 840, 770, 730, 620, M-16, M12.

Sewer – Nothing to report.

Storm Water – Nothing to report.
