CITY OF HIAWATHA
VEHICLE REPLACEMENT REQUEST FORM

Department: Streets Fiscal year: FY17
(If vehicle is funded by more than one department list all departments)

Scheduled replacement fiscal year: FY17

Year, make, model, attachments and original purchase price and date of vehicle.

2001 Ford F550 $10,000 7/2010 1993 International Bucket truck $9,200 8/2006

Vehicle description and justification:

- Vehicle #585 is a 2001 Ford F550 with 20,000 miles on it. We purchased it used from the Fire Dept in July of 2010.
- Vehicle #530 is a 1993 International Bucket truck with 82,000 miles on it. We purchased it used from an Alliant Energy auction in August of 2006.

I have been doing some research on bucket trucks for the past three years. You may recall 2.5 years ago council had passed Resolution #14-145 approving the replacement of the bucket truck in an amount not to exceed $40,000. However, at the time we couldn't find a 2-person bucket truck in our price range. In discussing with the guys we have decided to sale the 2 trucks mentioned above.

We would like to replace the 2 trucks with one and purchase a 2009 Ford F550 Bucket truck with 95,000 miles on it. This truck is currently in transit to I80 Truck Equipment in Colona, Illinois. Once they receive it we'll go look at it to be sure it is the truck that we want. If we approve it, they will go through it from top to bottom, including new paint, boom inspection and engine inspection. Purchase price will be $58,000 and it will be ready in about 2 months. It's a diesel so the mileage does not concern me so much. New bucket trucks of this style cost $140,000+.

Vehicle #585 is a usable truck but needs some repairs. These include:

- Tires($1,200).
- Rear brakes and rotors($500).
- Front end work($1,000).
- New/rebuild utility box($5,000-10,000).

The truck is probably worth about $10,000 resale.

Vehicle #530 is also a usable vehicle but is 25 years old and does not address our safety concerns. This truck is probably worth about $10,000 resale. Combining these 2 vehicles would reduce our fleet by 1 but would provide us with more versatility with the bucket truck.

Positive features of the 2009 Ford 550 Bucket truck:

- Addresses our safety issues.
- Combines two trucks into one saving space in shop.
- Reduction in maintenance cost
- Staff can easily maneuver equipment around light poles and trees. The current bucket truck has an over-center system which is harder to do smaller movements with.
- Actually has a 5' higher reach.
- Bucket system is an articulating/telescoping system that allows for easier and safer bucket movement. This comes in handy when hanging snowflakes and flags.
- The 2-person bucket will help when hanging snowflakes and working on street lights.

- We will also make this our sign install truck and equip it with supplies for signs.

I am requesting council permission to purchase the 2009 Ford 550 bucket truck at a cost not to exceed $58,000, if it meets our expectations. We have money in the Equipment Reserve Fund to purchase this truck. Total of combined reserve dollars is about $61,000. The dollars received from the sale of the older vehicles will be placed back into the equipment reserve fund. We will investigate using the Alliant Energy Equipment Auction to sell these trucks.

Let me know if you have any questions.
Thank you.

Number of vehicles requested: 1 Estimated Cost: $58,000

Estimated Re-sale value (both trucks): $20,000

Net cost: $38,000
