Re: August Public Works Report

Streets – We repaired a concrete blow up that occurred in July on Blairs Ferry Rd. We were going to have a contractor do it but they were all too busy so we did it ourselves. We replaced some of the LED traffic signal lights on Boyson and I380 ramps. Some of the LEDs were burning out. We put up the flags for FunFest and Labor day. We did some prep work for FunFest including setting out barricades and putting up temporary No Parking signs. We swept the streets and did the ROW mowing. Vehicles serviced: 810, 580, 820, 830, 850, 800. 330, C-12, 550.

Sewer – So far I think we have the issues out at the County Home Rd lift station resolved. They could be caused by intermittent power outages in this area. Electric Pump tech increased the call delay timing and this has helped so far.

Storm Water – We had an issue with the drain tile on S. Ashworth Ct. Some of the drain tile along the curb line was not installed correctly so it wasn't draining properly. We had to replace about 60 feet of drain tile to get it to drain right. The problem wasn't noticeable until a new house was built on this street.
