From: John Bender PE, City Engineer

Re: **Emmons Street Crossing Repair/Stabilization Project**

Description: **Agreement with the Railroad for Construction of Emmons and Erosion Control**

Payment #2

Report:

The Chicago Central and Pacific Railroad completed work on the ditch stabilization project to repair erosion conditions along the street and tracks in Hiawatha last year. The City negotiated an agreement with the railroad to participate in the cost of the ditch reconstruction and the replacement of the Emmons Street. This will be the final phase of the new rubberized crossing at Emmons Street that was completed the year before using the State of Iowa Crossing Repair funds.

The approach was to have the railroad contractor perform all the work after the City prepared the construction drawings. The City will make 4 annual payments to the railroad of $100,000.00 to cover our share of the cost. This is our second payment.

Engineering recommends approval of this payment at this time.

If you need any further information, please let me know.
