#### **2016-2017 Emmons Street/North Center Point Road/Robins Road Intersection Improvements Phase 2 Roadway Package Project - Change Order #3 reflecting an increase in contract amount with Rathje Construction Co.**

City Engineer Bender gave a brief overview of the change order for the 2016-2017 Emmons Street/North Center Point Road/Robins Road Intersection Improvements Phase 2 Roadway Package Project as follows:

Change Order #3 is the cost for changing the pavement markings originally planned from Emmons Street to the railroad on North Center Point Road and adding pavement markings removal and new pavement markings from the railroad north to Boyson Road. The proposal is to reconfigure this section of roadway from a four-lane roadway to a three-lane roadway with the addition of bike lanes. After this proposed revision, the only section of Center Point Road that is remaining a four-lane section is the area between Emmons Street and Blair's Ferry Road. The project consultant recommended the City not make any revisions in this area until after the construction is complete and traffic resumes the normal patterns.

A roadway reconfiguration known as a "Road Diet" offers several high-value improvements at a low cost when applied to traditional four-lane undivided highways. In addition to low cost, the primary benefits of a road diet include enhanced safety, mobility and access for all road users and a "complete streets" environment to accommodate a variety of transportation modes. A road diet typically involves converting an existing four-lane, undivided roadway segment to a three-lane segment consisting of two through lanes and a center, two-way left-turn lane.

The existing paving north of Emmons Street will provide sufficient width for a three-lane section and two-bike lanes 6.5 feet wide and a three-foot buffer area on each side. This will work well with the posted speed limit of 35 mph and provide a very safe riding area for bikes and bus stop lanes. The proposed painting plan includes removing all the existing lines and symbols and painting of the lines as shown on the plan.

Council Member Olson expressed the need to move forward with maintaining a four-way stop at the Center Point Road and Willman Street intersection; don't see a need to wait for the consultant. Other City Council members agreed with Olson.

Bender said implementing a permanent four-way stop at the intersection of Center Point Road and Willman Street would require an ordinance change.

Council Member Olson directed staff to draft the ordinance change and bring it back to City Council for approval; there is a need to slow traffic down in the Town Center district.

Rampulla presented RESOLUTION #17-149 approving Change Order #3 for the 2016-2017 Emmons Street/North Center Point Road/Robins Road Intersection Improvements Phase 2 Roadway Package Project with Rathje Construction Co., of Marion, Iowa, with an increase in contract amount of \$7,150.00, resulting in a revised total project contract amount of \$2,826,676.26, seconded by Olson. Roll call vote: AYES: Rampulla, Bruns, Wichtendahl, Olson, Norton. NAYS: None. **RESOLUTION #17-149 adopted.**

There being no further discussion, Rampulla moved to adjourn at 5:50 P.M., seconded by Wichtendahl. Motion carried.
